Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-17 and 27-29, drawn to a method of diagnosing or determining a heightened probability of having attention deficient-hyperactivity disorder (ADHD) comprising assessing dopamine transporter, classified in class 424, subclass 1.65+.
- II. Claims 18-26 and 30-35, drawn to a method of determining the effectiveness or monitoring treatment of ADHD, classified in class 424, subclass 9.2.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions are different because one monitors treatment, while the one is used to diagnose. They would not generally be used together because one would generally not monitor treatment prior to diagnosis. Also, they have different functions, modes of operation and effects, as one is strictly a diagnostic tool, while one requires treatment and assessment of the treatment.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Species Requirement

This application contains claims directed to the following patentably distinct species of the claimed invention: 1) the various labeled dopamine transporter ligands as set forth in the claims.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. **NOTE:** the elected species will name a specific labeled dopamine transporter ligand (i.e., a single

Art Unit: 1616

compound with a single specific label), for example, the compound set forth in claim 6. This species requirement is in addition to the elected group.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Information Disclosure Statement

The information disclosure statement filed 04/01/2002, to which a faxed copy of the PTO Form-1449 was received, did not include copies of the references, as stated in the faxed response. However, these references (i.e., which are mostly journal articles) are not present in the parent application. Applicant has stated that if the examiner would like a copy of these references, please notify as such.

Art Unit: 1616

The examiner hereby requests copies of the references on the original IDS, filed 04/01/2002 of which a faxed copy was requested and received, for consideration thereof. It is further asked that these references are provided either prior to or with the response to this restriction requirement.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Michael G. Hartley whose telephone number is (703) 308-4411. The examiner can normally be reached on M-F, 7:30-5, off alternative Mondays.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Jose G. Dees can be reached on (703) 308-4628. The fax phone numbers for the organization where this application or proceeding is assigned are (703) 308-4556 for regular communications and (703) 308-4556 for After Final communications.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is (703) 308-1235.
